Work Experience:

Electrical and Construction Supervisor /
Superintendent

August 2023 – March 2025
Toronto, ON

Onxpress Transportation Partners

- Oversaw daily operations for 25 subcontractors on major Metrolinx projects, ensuring compliance with ONxpress and GO Rail safety standards.
- Managed scope execution using detailed drawings and project schedules, achieving 100% on-time weekly milestones.
- Collaborated closely with structural, HVAC, mechanical supervisors and field coordinators to align site logistics.
- Produced daily site reports, tracked safety observations, and drove quality assurance initiatives.
- Participated in project budgeting, cost estimation, and vendor coordination for equipment/material deliveries.
- Led job briefings, identified risks, and enforced corrective actions for improved safety and productivity.
- Collaborate with project managers, architects, engineers and subcontractors to understand project goals, plans, and specifications.
- Monitor construction processes to ensure compliance with design, specifications, and industry standards.
- Conduct regular inspections to identify and rectify any deviations or deficiencies in workmanship.
- Implement and enforce strict safety protocols and practices to ensure a secure work environment for all personnel on the construction site.
- Coordinate with procurement teams to ensure timely delivery of materials and equipment to the site.
- Identify potential obstacles or challenges in proactively developing solutions to prevent delays or

disruptions.

- Address unforeseen issues promptly and make quick decisions to keep the project on track.
- Conduct regular meetings to communicate project updates and expectations to the construction team.
- Identify opportunities for cost savings without compromising quality and safety.
- Perform condition assessments of pavements, signs, guardrails, bridges, vegetation and other contract requirements.
- Assist with the estimation of new bids for the purpose of supplying hours for Work Planning functions
- Mentor, train, manage team, and oversee responsibilities of the field team on the project. Lending expertise and support to the team at several adjoining phases of the project.
