PROFESSIONAL SUMMARY

Construction Engineering Technology graduate with hands-on experience in construction environments and a strong understanding of how projects are coordinated from drawings and site activities through estimating, scheduling, and documentation. Comfortable supporting teams with document control, bidding-related tasks, quality practices, and safety compliance. Proficient in Procore, Bluebeam Revu, AutoCAD, Revit, Navisworks, Microsoft Project, Excel, and QuickBooks. Seeking an entry-level role in project coordination, estimating, or site administration.

EDUCATION

George Brown College, Toronto, ON

Construction Engineering Technology | January 2024 - April 2026

- Developed knowledge in construction estimating, budgeting, scheduling, site development, contract documents, bidding, and project coordination
- Applied industry software for drawing review, document management, scheduling, and project support
- Built knowledge of Ontario building codes, regulations, building science, and sustainable construction practices
- Gained understanding of structural systems and basic MEP coordination

College of Carpenters and Allied Trades, Woodbridge, ON

Level 1 Basic Carpentry | April 2016

- Trained in construction safety, materials, tools, estimating, layout, plans, specifications, and code application
- Gained hands-on exposure to welding and practical carpentry fundamentals

TECHNICAL SKILLS

Software: Procore (certified), Revit, Building Information Modeling (BIM), Navisworks, Bluebeam Revu, AutoCAD, Microsoft Project, Microsoft Excel, QuickBooks

Project Coordination: Blueprint reading, drawing interpretation, site coordination, project scheduling, document control, material coordination, quantity takeoff, cost estimating, tendering/bidding support

Construction Knowledge: Contract documents, Ontario building codes, zoning, building science, construction accounting, project financing, structural fundamentals, sustainable construction, basic MEP coordination

Field & Quality: Clash detection, quality control, safety compliance, site support, construction administration

PROFESSIONAL EXPERIENCE

Appliance Technician Manager

Belaty LTD, Etobicoke, ON | September 2018 – January 2024

- Managed installation, repair, and maintenance work in residential properties and active construction environments while maintaining safety, quality, and workflow standards
- Coordinated with construction teams to ensure installations aligned with drawings, site conditions, and project requirements
- Resolved field and finishing-stage issues to support proper integration, quality outcomes, and timely completion
- Trained and supervised technicians on installation procedures, safe work practices, and quality expectations
- Organized daily work activities, team coordination, and task execution to support efficient operations

General Labourer

Maxim Group General Contracting, Toronto, ON | December 2016 – May 2018

- Supported site operations including formwork, concrete placement, rebar installation, demolition, and material handling
- Read and interpreted blueprints to assist with accurate installation and site execution
- Used hand and power tools safely and effectively while following site safety procedures
- Assisted crews with day-to-day coordination to help keep work areas organized, productive, and on schedule

General Carpenter

Action Scaffold, Toronto, ON | April 2016 – September 2016

- Assisted with the assembly and dismantling of scaffolding and temporary fencing for the Ontario Honda Indy project
- Worked with site crews to provide safe access to work areas and maintain stable temporary structures
- Maintained tools and equipment in good working condition to support safe and efficient operations
